- Collab with the team to manage the bulk email functionality with advanced scheduling, enabling users to efficiently manage large-scale email campaigns.
- Implemented misc. AI features to enhance user productivity and streamline the campaign management process.
- Tech-stack : Next.js(T3 Stack) / Nest.js.

SKILLS

- **Front-end** : Javascript, Html/Css , React , Next.js .
- **Back-end** : Node.js , Nest.js , Python .

Personal Projects**Full-stack Blog .**

I developed a blog project using Next.js, incorporating advanced features to enhance user experience and functionality. Leveraging Next.js for efficient rendering and routing, I integrated NextAuth.js to enable seamless Google and GitHub authentication. The project also utilizes Prisma with MongoDB for structured data storage and Google Firebase for image storage, ensuring secure and optimized data handling. This combination of technologies results in a robust and user-friendly blog application, providing a rich and interactive experience for both readers and content creator

- Tech-stack : Next.js, MongoDB, Prisma, Google firebase and google Oauth.

Responsive Portfolio

I designed and developed a modern and responsive portfolio website using Next.js, Framer Motion, TypeScript, Tailwind CSS, and integrated email functionality. Leveraging the power of Next.js for efficient server-side rendering, Framer Motion for smooth animations, TypeScript for type safety, and Tailwind CSS for a sleek design, the project showcases my technical expertise and attention to detail. The addition of an email feature enables easy communication, making it a versatile and user-friendly platform to present my work and connect with visitors.

- Tech-stack : Next.js, Typescript , Tailwind css.
